Kadapa, Andhra Pradesh, India

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT), Proddatur

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.0/10.0 (Zero Backlogs)

Proddatur, AP

2023 – 2027

Narayana Junior College

Intermediate (AP State Board); Percentage: 80.03%

Proddatur, AP

2021 – 2023

WORK EXPERIENCE

Reshapp

Python AI Full Stack Developer Intern

Remote, India

April 2026 – Present

- Working on backend development using FastAPI and Flask to build clean web applications and handle AI model integrations.
- Writing Python code to connect OpenAI API with ChromaDB vector database for smart document search features.
- Testing and building REST APIs, updating MySQL database schemas, and working with the team in regular development sprints.

CERTIFICATIONS

AWS Cloud Practitioner Essentials | AWS Training & Certification

June 2026

TECHNICAL & SOFT SKILLS

Programming Languages: Python, SQL (Structured Query Language)

Web Frameworks & Tech: FastAPI, Flask, REST APIs, HTML5, CSS3

Databases & Storage: MySQL, SQLite, ChromaDB (Vector DB), Relational Databases (RDBMS)

Developer Tools & DevOps: Git, GitHub, VS Code, Boto3 SDK, Postman API Testing, Cloud FinOps

Core CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), DBMS

Soft Skills: Professional Communication, Teamwork, Critical Thinking, Technical Problem-Solving

PROJECTS

CBIT-Career-Hub: Campus Placement Portal | Flask, MySQL

GitHub

- Built a college placement website using Flask where students can register and view upcoming company drive updates.
- Created MySQL database tables with proper primary/foreign keys and wrote optimized SQL queries to fetch student data quickly.

IntelliSecure: Multi-Role Query Engine | FastAPI, MySQL, JWT

GitHub

- Developed a secure backend application using FastAPI with separate login access levels for Admin, Manager, and Employee roles.
- Implemented user session security by adding middleware logic, achieving a **35% performance boost** in safe query routing.

IntelliDoc AI: Smart Document Analyzer | FastAPI, OpenAI, ChromaDB

GitHub

- Created a document question-answering tool in Python that extracts text from files, breaks it into chunks, and runs text search.
- Built FastAPI endpoints that accept user queries, convert them into vector data, and fetch accurate answers using ChromaDB.

Enterprise Cloud FinOps & Automation Framework | Python, Boto3

GitHub

- Wrote an automation script in Python using the AWS Boto3 SDK to monitor system health logs and scan for idle resources.
- Created a local setup that automatically schedules cleanup workflows, helping save up to **40% processing overhead costs**.

KEY ACHIEVEMENTS

Open-Source & Deployment | Flask, LAN Deployment, MySQL

- Successfully hosted and ran the placement portal application over the college local network (LAN) to test with **500+ student profiles**.

Cloud Infrastructure Metric | Python, Boto3 SDK, Cost FinOps

- Developed an internal monitoring script using Python Boto3 that automatically cleans up idle test instances to save server costs.

CODING PROFILES

LeetCode | Solved 100+ DSA Problems

- Regularly practicing and solving core data structure and algorithm problems on arrays, strings, and logical coding setups.
